**Remel Announces Availability of Sterile
Plated Media for Environmental Monitoring**

April 2007 - Remel is pleased to announce availability of Sterile Plated Media for Environmental Monitoring. Remel offers irradiated and non-irradiated media manufactured in a Class 10,000 (ISO Class 7) clean room with Class 100 (ISO Class 5) work-zones to ensure high levels of sterility. Important to note, all sterile plated media from Remel has received gamma-irradiation treatment validated in accordance with 2006 ISO 11137-1, 2, 3 standards to achieve the highest available sterility assurance level (SAL 10⁻⁶). Each lot is tested for consistent, reproducible results and growth performance to minimize the risk of costly false positives.

Large single lots are available to minimize time spent on QC testing in your lab. Lot specific Certificates of Quality are conveniently included with each product and available online. For more information or to arrange a product evaluation, contact marketing@remel.com.

About Remel

Remel is part of Thermo Fisher Scientific, and is a global provider of a wide range of high quality microbiology products used by clinical, industrial, research, and academic laboratories. Remel is a world leader in the manufacture and distribution of dehydrated and prepared culture media, collection and transport systems, diagnostic and rapid direct specimen tests, quality control products and much more. An extensive product portfolio, which includes trusted, market leading brand names, and superior product performance, is complemented by a team of experts dedicated to providing the highest levels of technical support and customer service. For more information about Remel or its products, visit www.remel.com or call 800-255-6730.
